

Hi^{AI} - in Action: Productivity, Reimagined

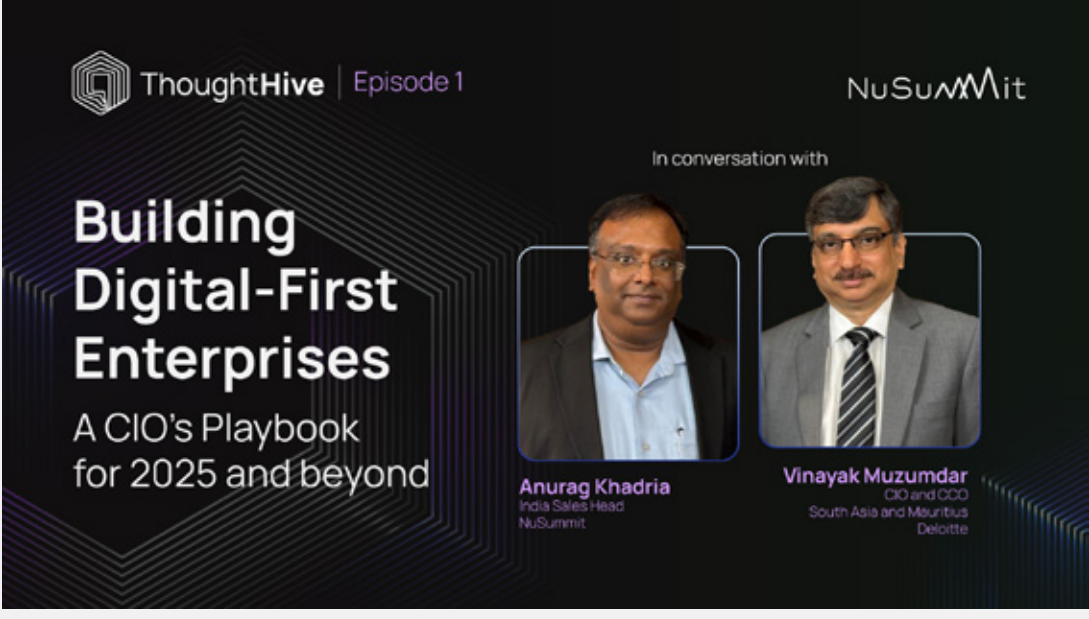

What does real productivity look like in financial services today?

It's no longer about longer hours or larger teams, but smarter workflows powered by AI. At NuSummit, **Hi^{AI}** means elevating human potential with AI that scales, contextualizes, and delivers measurable results.

In this edition, we spotlight how AI can help financial institutions streamline operations, reduce decision-making fatigue, and amplify human expertise across business lines. It's not just automation, it's acceleration.

In the Spotlight: CIO Playbook for Building Digital-First Enterprises

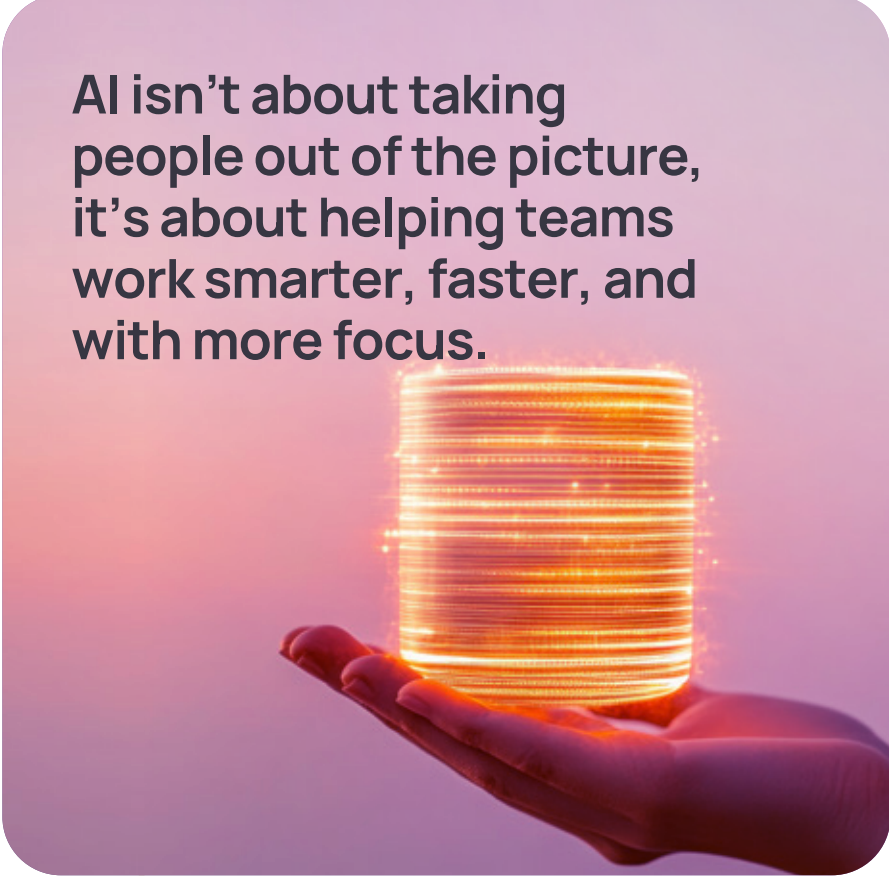

What does it really take to lead a digital-first transformation in today's enterprise?

Vinayak Muzumdar, CIO & CCO of Deloitte South Asia, offers a rare behind-the-scenes perspective, from modernizing legacy systems and adopting AI to rethinking governance and cybersecurity. A must-watch for tech leaders ready to drive meaningful change at scale.

AI for Productivity: What Makes NuSummit Different

AI isn't about taking people out of the picture, it's about helping teams work smarter, faster, and with more focus.

We help financial services organizations:

- **Automate** mundane tasks like research, reporting, and routing
- **Reskill and upskill teams** for human + AI collaboration.
- **Empower** non-technical users with natural language interfaces.
- **Redesign** workflows for measurable productivity gains.
- **Deploy** AI-ready tools that balance performance with control.

NuSummit in Action: Select Solutions

BrokerAid
Regulatory updates turned into actionable AI insights.

NuSummit BuilderAI
Drag-and-drop AI assistant builder- no code needed.

Insightomatic
Query enterprise data using plain English, get instant, accurate responses.

Conversational BI
Turn questions into answers, instantly. Our GenAI-powered BI layer helps teams surface insights through natural language, no dashboards or SQL required.

Case Study Spotlight

Transforming BI for a Leading Insurance Provider

- Challenge:** Static MIS reporting created delays and limited insight access across teams.
- NuSummit Solution:** A GenAI-powered conversational interface integrated with live data, enabling instant responses to business queries.
- Results:**
 - 3x faster access to insights
 - 40% reduction in BI team dependency
 - Increased adoption of data-driven decision-making across underwriting and servicing
